Name Correction NAME

Trial Kundali = 6 (Name is already on a favourable vibration)

One cannot change their date of birth, to make numbers more favourable. But each alphabet also carries a Number, a vibration, and the sum total of all the alphabets put together forms a number. We need to see if the name we use in our daily life adds to an auspicious number (Planet) or not. If not, then by adding or deleting alphabets from your NAME, we can bring your name on a favourable number and this can shift vibration and can create opportunities. So the most important aspect in Numerology is to bring your name on a Fortunate number.

Start writing your New name in Blue Ink, new name for 24 times for 24 Days on a notebook to get positive vibrations.

How To Do Your Signature

Step I · No Vacuum

Any alphabet of the name should not have any vacuum in between them.

Step II · Name & Fame

It should be in ascending descent. It represents that your name is touching new heights of name and fame.

Step III · Support

There should be a line below the signature. Please make sure it should not cut any of the alphabets in your name. It represents support to your name.

Step IV · Authority

There should be two dots below the line which represents extra support to your name and authority.

1. One must avoid signing cursive or running to single Alphabets, meaning lift the pen after each alphabet, not joining any two alphabets, to retain value of the particular alphabet.
2. The new signature (with New name) should slant upwards in around 45 degrees angle, like a plane taking off. From wherever you begin, slant it on the right hand side, a little upward.
3. Underline the signature from the beginning to end of name as it serves as a platform. Don't cut the name with the line, don't dip the line downwards. It should be parallel to the name, going upwards at a 45% angle.
4. Each alphabet should be readable and visible - only then it will hold value. Each alphabet should be separate, not joined with each other.
5. Change the name in places such as visiting cards, credit cards, bank account, email address and social media. Most of the problems faced by you can be overcome with the change in spellings.
6. Start writing your New name in Blue Ink, new name for 24 times for 24 Days on a notebook to get positive vibrations.
7. Success is a combination of Fortune and Hard work. God Bless.

Vyaktitva Vishleshan Personality Analysis (व्यक्तित्व विश्लेषण) PERSONALITY

Trial Kundali, at the centre of your personality sits Moolank 5 (Mercury) - this is the part of you that people meet first and that decides how you instinctively react. Behind it runs Bhagyank 6 (Venus), the direction life keeps pushing you in, and the two are friendly with each other. Your birth grid carries 4 of the nine numbers, leaving 5 absent (2, 3, 5, 6, 7) - and those gaps are exactly where life will keep setting you the same lesson until you learn it. What follows is honest on both sides: first what is genuinely strong in you, then what works against you, and finally what to actually DO about it. Nothing in the second list is permanent - every one of those points has a correction listed against it.

Your Strengths What Is Good In You STRENGTHS

Quick mind and easy communication

You think fast, adapt faster, and can talk to almost anyone. Commercial instinct comes naturally - you sense where value sits in a deal. Change energises you rather than frightening you, which keeps you young in outlook throughout life.

Moolank 5 (Mercury)

Warmth and magnetism

People are drawn to you. You carry a natural sense of beauty, comfort and care, and you make spaces and relationships feel good. You are genuinely responsible towards family, and that reliability is quietly noticed by everyone close to you. This comes to you through your destiny number rather than your nature, which means it grows stronger with age and experience - by mid-life it becomes one of your most recognised qualities.

Bhagyank 6 (Venus)

Courage and drive - doubled

The number 9 (Mars) appears twice in your birth grid, which strengthens this quality well beyond average. You have real physical and moral courage. You act while others hesitate, you defend people who cannot defend themselves, and you finish what you begin. Your energy level is above average and it lets you carry workloads that would flatten most people.

9 appears 2x in the Lo Shu grid

A strong mind

Your mental plane is well filled - memory, reasoning and imagination all work at a good level. You absorb new information quickly and can hold complex problems in your head without losing the thread.

Mental Plane (Manas Lok) - Balanced

Practical capability

Your physical plane is well filled - you get things DONE. Ideas become action quickly, you have good stamina for real-world work, and people rely on you because what you promise actually arrives.

Physical Plane (Sharira Lok) - Balanced

Strong inner will

Your soul plane is well filled - willpower and inner conviction run deep. Once you truly decide something, you do not need external motivation to keep going, and pressure tends to clarify rather than break you.

Soul Plane (Atma Lok) - Strong

Your Challenges What Works Against You CHALLENGES

Nervous strain and inconsistency

You take on too much at once and your nervous system pays the bill - overthinking, poor sleep, irritability. You get bored before things mature, so long projects and long commitments suffer. Cleverness sometimes replaces honesty in your speech when you are cornered.

Moolank 5 (Mercury) - shadow side

Comfort-seeking and over-attachment

You avoid discomfort, and that avoidance quietly costs you. Luxury, food and pleasant company can absorb the energy meant for ambition. In relationships you may give too much, then feel unappreciated, or hold on to people and situations well past their expiry.

Bhagyank 6 (Venus) - shadow side

Blunt handling of emotions

With 2 absent, you may deal with people more directly than they can absorb, miss emotional signals entirely, and be surprised when someone is hurt. Patience with slower or more sensitive people can run out quickly.

Missing 2 (Moon) - absent from your grid

Under-expressed ability

With 3 absent, you may know far more than you are given credit for, because expressing it does not come easily. Self-doubt about your own knowledge, hesitation in speaking up, and difficulty putting thoughts into words can hold your reputation below your actual ability.

Missing 3 (Jupiter) - absent from your grid

Hesitance in dealing with the world

With 5 absent, negotiation, self-marketing and money conversations feel awkward. You may undersell yourself, avoid bargaining, and stay too long in situations you have outgrown because change feels risky rather than exciting.

Missing 5 (Mercury) - absent from your grid

Difficulty with warmth and responsibility

With 6 absent, showing care does not come automatically. You may feel affection strongly but rarely express it, treat home and relationships as secondary to work, and struggle to accept responsibility for other people's comfort.

Missing 6 (Venus) - absent from your grid

Little stillness or inner reference

With 7 absent, you stay busy on the surface and rarely go inward. You may distrust intuition, dismiss anything you cannot measure, and find silence uncomfortable - which slowly costs you perspective and peace.

Missing 7 (Ketu) - absent from your grid

Excess of 1 (Sun)

The number 1 is repeated strongly in your grid, which pushes self-will into stubbornness - you may find it almost impossible to yield even when yielding is correct. The same strength that makes you lead can make you unable to take instruction. You may dismiss advice too quickly, insist on being right, and hurt people with bluntness without realising it. Taking orders from someone you do not respect is genuinely hard for you.

1 appears 3× in the Lo Shu grid

Emotional expression is difficult

This plane is thin, so feelings are either not registered or not expressed. You may appear detached to people who need warmth from you, and you may not notice tension building in a relationship until it breaks.

Emotional Plane (Bhava Lok) - Absent

Arrow of Determination - absent

Lacks follow-through and may abandon goals easily. Must consciously build discipline.

Arrow of Determination (1-5-9) incomplete

Arrow of Intellect - absent

May struggle with learning, concentration, and analytical thinking.

Arrow of Intellect (3-5-7) incomplete

Arrow of Planning - absent

Poor at planning and organisation. Needs external structure.

Arrow of Planning (1-2-3) incomplete

Arrow of Prosperity - absent

Financial struggles possible. Must work extra hard for material security.

Arrow of Prosperity (2-5-8) incomplete

Arrow of Spirituality - absent

Struggles to connect with higher purpose. Overly materialistic nature.

Arrow of Spirituality (3-6-9) incomplete

Arrow of Practicality - absent

May lack grounding and practical skills. Prefers theory over action.

Arrow of Practicality (4-5-6) incomplete

Arrow of Willpower - absent

Low physical energy and willpower. Must guard against inertia and laziness.

Arrow of Willpower (7-8-9) incomplete

Arrow of Compassion - absent

May seem cold or insensitive. Must consciously develop empathy.

Arrow of Compassion (1-4-7) incomplete

Arrow of Balance - absent

Emotional instability and reactive behaviour. Must cultivate inner peace.

Arrow of Balance (2-6-8) incomplete

How To Overcome Your Corrections SOLUTIONS

1. Nervous strain and inconsistency

Reduce input so the nervous system can settle. Cut stimulants, take one screen-free hour every day, and commit fully to fewer things - your results come from depth, not variety. Slow your speech deliberately; measured words protect both your reputation and your peace.

DO THIS: Take one full hour with no screen daily, and finish it with ten minutes of slow breathing.

2. Comfort-seeking and over-attachment

Choose one deliberate discomfort daily so comfort stops running the show - early rising, exercise, or the difficult conversation you keep avoiding. In relationships, give generously but state your own needs plainly instead of waiting to be noticed and then resenting it.

DO THIS: Do the hardest task of your day first, before anything pleasant.

3. Blunt handling of emotions

Treat listening as a skill to be practised, not a personality trait. Before responding, repeat back what the other person said in your own words. Nightly reflection on the day's conversations builds the missing sensitivity fast.

DO THIS: In your next disagreement, repeat their point back before giving yours.

4. Under-expressed ability

Exercise expression daily - read aloud, teach what you know to one person, write short notes on what you learn. Jupiter grows only by being used; twenty focused minutes a day changes this within months.

DO THIS: Teach or explain one thing you know well to someone this week.

5. Hesitance in dealing with the world

Treat commercial skill as learnable. Practise stating your price without apologising or explaining. Read aloud daily to loosen expression, keep greenery at your work desk, and deliberately expose yourself to small, safe changes.

DO THIS: State a price or ask for what you want once this week - without justifying it.

6. Difficulty with warmth and responsibility

Make care a scheduled practice until it becomes natural: express appreciation to one person daily, and improve one corner of your home every week. Small consistent gestures rebuild this current far better than occasional grand ones.

DO THIS: Tell one person specifically what you value about them - today.

7. Little stillness or inner reference

Build sacred solitude deliberately: fifteen silent minutes daily, a periodic day away from screens, and one spiritual practice done with total regularity rather than intensity. Consistency matters more than the method chosen.

DO THIS: Sit in silence for fifteen minutes daily - same time, no phone.

8. Excess of 1 (Sun)

Deliberately invite disagreement before you decide. Keep two or three people in your life who are allowed to tell you that you are wrong, and thank them when they do. Practise saying "you may be right, let me think about it" - it costs nothing and it keeps good people beside you.

DO THIS: Once a week, ask one person: "what am I getting wrong here?" - and just listen without defending.

9. Emotional expression is difficult

Name feelings out loud to one safe person regularly - this is a trainable skill. Ask direct questions about how others feel rather than assuming everything is fine because nothing was said.

DO THIS: Ask someone close: "how are things actually going?" - and wait for the real answer.

10. Arrow of Determination - absent

Determination has to be manufactured rather than felt. Work in fixed short blocks with a timer, and never end a session at a difficult point - always stop just after a small win, because that is what makes you willing to return tomorrow.

DO THIS: Set a 25-minute timer on the task you keep avoiding, and stop only when it rings.

11. Arrow of Intellect - absent

Study in writing rather than by reading. Notes taken by hand, problems worked end-to-end, and explaining a topic aloud to someone else will build the analytical current that the grid did not supply.

DO THIS: After anything you learn, write four lines about it from memory - no looking back.

12. Arrow of Planning - absent

Never hold a plan in your head. Write the week down on paper every Sunday, break each item into its first physical step, and keep the list where you can see it. Borrowed structure works as well as natural structure.

DO THIS: Every Sunday, write the coming week down before it starts.

13. Arrow of Prosperity - absent

Money will not accumulate by instinct here, so let a system do it. Save a fixed share on the day income arrives, keep written accounts, and avoid lending to people who cannot repay - this arrow makes such money very hard to recover.

DO THIS: Automate a fixed saving on your income date and do not touch that account.

14. Arrow of Spirituality - absent

Faith needs a practice, not a feeling. Fix one short daily ritual - a lamp, a mantra, ten silent minutes - and keep it regardless of mood. Serve at a temple or a charity monthly; devotion grows through the hands before the heart.

DO THIS: Light a lamp and sit quietly for ten minutes at the same time daily.

15. Arrow of Practicality - absent

Get your hands into physical work deliberately - repair something, cook, garden, build. Theory is your comfort zone and it is exactly what keeps this arrow empty. Finish one tangible object or task each week.

DO THIS: Do one hands-on task to completion this week - something you can point at.

16. Arrow of Willpower - absent

Physical energy is the root here, so treat the body first: regular exercise, fixed sleep and no skipped meals. Then add one small daily discipline kept without exception - willpower is built by repetition, not by resolve.

DO THIS: Exercise at the same time daily, even for fifteen minutes, without negotiating.

17. Arrow of Compassion - absent

Empathy is trainable. Ask people how they are and wait for the full answer without solving it. Do something regularly for someone who cannot repay you - service builds this current faster than reflection does.

DO THIS: Listen to one person fully today without offering a single solution.

18. Arrow of Balance - absent

Emotional balance comes from routine, not from control. Keep steady sleep, meals and exercise, and give reactions a deliberate delay - decide nothing important while the feeling is still hot.

DO THIS: When upset, wait a full day before acting or replying.

None of the difficulties above is a verdict. In Ank Jyotish a weak or missing number is not a punishment - it is simply an ability that was not handed to you at birth and therefore has to be built consciously, and a number built consciously often ends up stronger than one that came free. Work on ONE correction at a time. Take the challenge that is costing you the most right now, apply its remedy for forty unbroken days, and only then move to the next. One remedy held for forty days changes more than ten remedies attempted for a week each. Your strengths are already working for you without effort; give the same steadiness to the corrections and the two lists start to converge.

Ganit Vidhi How Every Number Is Calculated (गणित विधि) गणित

Nothing in this report is a black box. Below, every ank is derived step by step from your own birth digits and name letters, with the exact rule stated beside it so the reading can be verified by hand at any time.

Mool Ank = 5

मूलांक

Birth day 14 → 1+4 = 5

The Mool Ank (psychic/driver number) is the digit-sum of the birth DAY alone. It rules the outward personality and instinctive behaviour. Number 5 is governed by Mercury (Budha).

Bhagya Ank = 6

भाग्यांक

1+4+1+0+1+9+9+8 = 33 → 3+3 = 6

The Bhagya Ank (destiny/conductor number) is the sum of EVERY digit of the full date of birth (14-10-1998). The two-digit total 33 is the compound, read through Cheiro's compound table; the single digit 6 (Venus (Shukra)) is the operative destiny number.

Namank (Chaldean) = 6

नामांक (चाल्डियन)

T=4 R=2 I=1 A=1 L=3 K=2 U=6 N=5 D=4 A=1 L=3 I=1 → total 33 → 3+3 = 6

The OPERATIVE name number in Cheiro / Indian Ank Jyotish. Chaldean values are sound-based (A=1, B=2, C=3, D=4, E=5, F=8, G=3, H=5, I=1 ...) and no letter is ever valued 9 - that number is held sacred and can only appear as a total.

Namank (Pythagorean) = 6

नामांक (पाइथागोरियन)

T=2 R=9 I=9 A=1 L=3 K=2 U=3 N=5 D=4 A=1 L=3 I=9 → total 51 → 5+1 = 6

The Western cross-reference. Pythagorean values follow strict alphabet order in blocks of nine (A=1...I=9, J=1...R=9, S=1...). Shown for comparison; the Chaldean number governs Indian analysis and name correction.

Antarank (Soul Urge) = 1

अंतरांक

Vowels only: I=1 A=1 U=6 A=1 I=1 → 10 → 1+0 = 1

Only the vowels (A, E, I, O, U) of the name, summed with Chaldean values and reduced. The vowels are the breath of the name - they reveal the inner desire beneath the outward behaviour.

Pratibha Ank (Personality) = 5

प्रतिभा अंक

Consonants only: T=4 R=2 L=3 K=2 N=5 D=4 L=3 → 23 → 2+3 = 5

Only the consonants of the name, summed with Chaldean values and reduced. The consonants are the body of the name - the first impression and the mask others perceive.

Paripakv Ank (Maturity) = 3

परिपक्व अंक

Bhagya Ank 6 + Chaldean Namank 6 = 12 → 1+2 = 3

Destiny plus name, reduced. This vibration ripens after roughly age 35, when the life path and the accumulated identity of the name merge into one working frequency.

Name-Correction Rule (for Bhagya Ank 6)

नाम संशोधन नियम

Friendly: 2, 4, 5, 6 · Neutral: 1, 3, 9 · Enemy: 7, 8

Each number keeps friends and enemies through its ruling planet's relationships. The Chaldean name number is checked against the Bhagya Ank's row of this matrix: a friendly total supports destiny, an enemy total (7, 8) creates lifelong friction and is the classical ground for adjusting the spelling - the pronounced name never changes, only its letter-total.

Lo Shu Grid Construction (Standard)

लो शु ग्रिड

DOB digits placed: 1, 4, 1, 1, 9, 9, 8 (zeros are dropped)

Standard Lo Shu methodology: ONLY the non-zero digits of the date of birth occupy their fixed cells of the 3x3 magic square (4-9-2 / 3-5-7 / 8-1-6 - every line sums to 15). Zero has no cell and is never placed. Repeated digits strengthen a cell; empty cells are the missing numbers. Missing numbers, arrows and repetitions in this report are all read from this standard grid. Apna Astro additionally offers an "Augmented Lo Shu Grid" which adds Mool Ank 5 and Bhagya Ank 6; that is a house enhancement, shown separately and never presented as the classical DOB grid.

Personal Year = 7 (Pythagorean)

व्यक्तिगत वर्ष

day 5 + month 1 + current year 1 = 7 → 7

Pythagorean / Western methodology. Reduced birth day + reduced birth month + reduced current calendar year, reduced again. The Personal Year advances every January 1st and cycles 1 → 9; Personal Month = Personal Year + calendar month (reduced); Personal Day = Personal Month + date (reduced).

Apna Astro Ank Dasha Anchor = Venus

अंक दशा

Bhagya Ank 6 → Venus → traditional planetary order onward

Apna Astro Ank Dasha: a numerological planetary-period model inspired by the traditional Vimshottari planetary sequence and period lengths (Sun 6y, Moon 10y, Mars 7y, Rahu 18y, Jupiter 16y, Saturn 19y, Mercury 17y, Ketu 7y, Venus 20y). It is anchored to the planet ruling the Bhagya Ank. This is NOT Jyotish Vimshottari Dasha, which additionally requires the exact birth time, birth location, Moon longitude, nakshatra, pada and the dasa balance at birth.

Kua Ank = 2

कुआ अंक

10 - 8 (last two year digits reduced) → 2

Eight-Mansions directional number from the birth year (male: constant - year digits; a result of 5 becomes 2). It assigns your auspicious compass directions for sleeping, working and facing.

Moolank-Bhagyank Sanyog (मूलांक-भाग्यांक संयोग) संयोग

5-6 Sanyog: Mercury personality on a Venus path

Your Moolank 5 (Mercury) shapes the personality - its core drive is to connect, trade and adapt, and it hands you communication, business instinct and youthfulness. Your Bhagyank 6 (Venus) shapes the destiny road - life repeatedly asks you to love, beautify and nurture, rewarding you with charm, artistry and magnetic attraction. Mercury and Venus are natural allies in Ank Jyotish - what you enjoy doing and what destiny demands reinforce each other. Doors tend to open at the right time; your task is simply consistency. The subtle risk of a friendly sanyog is complacency: because charm, artistry and magnetic attraction come relatively easily, build deliberate stretch-goals or the potential stays partly unspent.

Karmic Rin Ank Karmic Debt Numbers (कार्मिक ऋण अंक)

Cheiro's tradition marks 13, 14, 16 and 19 as karmic-debt compounds. When one of these stands behind your birth day, date-of-birth total or name total, a specific past-life lesson repeats until consciously mastered - after which the same number becomes a source of unusual strength.

14 14/5 - The Debt of Freedom Birth day

Past misuse of freedom and the senses returns as a life of repeated sudden changes - in bonds, places and fortunes - until moderation is mastered. Excess of any kind re-triggers the cycle.

Upaya: Practise deliberate moderation: measured speech, clean diet, no addictive loops. Commit fully to a few people and projects; stability is the siddhi this number seeks.

Master Spandan, Master Vibrations (मास्टर स्पंदन)

Your full date-of-birth total carries the 33 vibration - the Master Teacher: healing and uplifting others becomes a destiny theme. Your Chaldean name total carries the 33 vibration - the Master Teacher: healing and uplifting others becomes a destiny theme. Indian Ank Jyotish reduces every number to 1-9 for prediction, but a master compound behind the single digit adds voltage to that digit - more potential, and more responsibility to live it consciously.

Pancha-Varshiya Phal Five-Year Forecast (पंचवर्षीय फल) वर्षफल

Each calendar year carries a Personal Year vibration (birth day + birth month + calendar year, reduced). The nine-year cycle 1 → 9 is the master rhythm of numerology: what is seeded in a 1-year is harvested in the 8 and released in the 9. Months inside each year are graded by Personal Month harmonics against your Bhagya Ank.

2026 Age 28 **Personal Year 7**

This vibration runs against your Bhagya Ank - treat the year as training: keep stakes moderate, honour the theme without forcing outcomes, and lean on the remedies. Best months: April, June, July, August. Handle with care: January, September, October.

2027 Age 29 **Personal Year 8**

Personal Year 8 (Saturn): Harvest of karma - money, authority and big material moves; act with integrity. Best months: March, May, June, July. Handle with care: August, September.

2028 Age 30 **Personal Year 9**

2029 Age 31 **Personal Year 1**

Personal Year 1 (Sun): New beginnings - plant the seeds of the next nine-year cycle; initiative and independence are rewarded. A neutral vibration for you - output will mirror input almost exactly. Best months: January, March, April, May. Handle with care: June, July.

2030 Age 32 **Personal Year 2**

Personal Year 2 (Moon): Patience and partnership - relationships, negotiations and quiet growth take the front seat. This vibration is friendly to your own numbers - momentum builds with less resistance; commit to the year's theme wholeheartedly. Best months: February, March, April, September. Handle with care: May, June.

Meel Ke Patthar Milestone Years (मील के पत्थर)

Personal Year 1 ages (4, 13, 22, 31, 40, 49, 58, 67...) open your nine-year chapters - decisions taken in those years echo for the whole cycle, so choose them consciously. Calendar years reducing to your Bhagyank 6 (next: 2031, 2040, 2049) are destiny-activation years - the outer world tends to deliver Bhagyank-themed events then, for better or richer.

Dates reducing to enemy numbers (7, 8) are not doom, but they add friction - keep such days for routine and review. For weddings and housewarmings, pair a favourable date with a favourable weekday for double support.

Sambandh Sarani Relationship Compatibility Matrix (सम्बन्ध सारणी) मिलान

Every person you meet carries a Moolank (their birth-day number). This matrix grades all nine numbers against YOUR chart - marriage is judged on your Bhagya Ank (destiny must harmonise for a lifetime bond), friendship on your Moolank (personalities must enjoy each other), and business on both. Verdicts guide, they do not veto: shared values and effort outrank any number.

Both numbers carry enterprise current - independent business or leadership roles suit you better than subordinate positions; take calculated ownership early.

With 5 absent from the Lo Shu grid, take negotiation and money-talk as learnable skills, not assumptions. The presence of 8 (Saturn) grounds wealth - earnings, once made, tend to stay if untouched by shortcuts.

Mercury personality works best in fast, varied, deal-rich environments, while the Venus destiny rewards entertainment & media most of all.

Ahara (diet): Green vegetables, sprouts and nuts; cut stimulant overload (excess tea/coffee).

Abhyasa (practice): Anulom-vilom pranayama and one screen-free hour daily restore Mercury's cool. As the destiny number also colours long-term health, add: dance, art or beauty-centred movement - Venus heals through enjoyed discipline.

Vyavaharik Ank Numbers You Live With (व्यावहारिक अंक) व्यवहार

Numerology does not stop at the birth chart - the numbers you carry daily (phone, vehicle, home) either resonate with your chart or grind against it. The rule everywhere is the same: reduce all digits to one, and prefer your friendly totals.

BEST TOTALS

6 · 5 · 2 · 4

Aim phone / vehicle / house here

AVOID TOTALS

7 · 8

Adds friction to daily life

METHOD

Σ digits $\rightarrow$ 1-9

Sum every digit, reduce to one

Mobile Ank (मोबाइल अंक)

Add all ten digits of a mobile number and reduce to one digit. Choose totals of 6, 5, 2, 4 - the phone is your Mercury-instrument, and a friendly total smooths every conversation it carries. Avoid totals of 7, 8; if stuck with one, a friendly-total secondary number for business calls is the practical fix.

Vahan Ank (वाहन अंक)

Reduce the digits of the registration number. A vehicle total of 6 or 5 or 2 or 4 travels in your frequency; totals of 7 or 8 deserve extra insurance discipline and calmer driving hours. Tuesdays and Saturdays are the days to service (not to first-drive) a new vehicle.

Griha Ank (गृह अंक)

Reduce the house/flat number the same way. A home total friendly to your Bhagyank steadies everything that happens inside it. If your current home reduces to 7 or 8, do not move houses over it - balance it: paint the main door in your lucky colours, and place your Bhagyank yantra in the Friday direction room described in the Vastu section.
