Vedic Varshaphal for the 29th running year (2026), cast for the Varsha Pravesha on 2026-10-14 at 04:27, Wednesday. The Varsha Lagna is Leo, the Muntha stands in house 3, and Mercury rules the year as Varshesha. Well placed: Moon, Venus. Needing care: Mars, Jupiter, Saturn, Rahu, Ketu. Read the Muddha dasha below for the timing within the year.

Muntha & Varshesha

The Muntha stands in Libra, the 3th house of the annual chart, ruled by Venus. This house governs courage, siblings and short travel, and the Muntha brings that area to the foreground for the whole year. A favourable Muntha - this is where the year opens up for you.

Mercury is the Varshesha - the Lord of the Year - placed in house 3 of the annual chart with a Panchavargiya Bala of 62.21/80 (Very Strong). It holds office, aspects the Varsha Lagna, and carries the highest Panchavargiya Bala among the bearers. The Varshesha sets the dominant tone of the year: its house shows where your attention will concentrate, and its strength shows how far the year's results will actually carry.

Varshaphal is the annual chart of Tajika Shastra. It is cast not for a birthday but for the Varsha Pravesha - the exact instant the transiting Sun returns to the same sidereal longitude it held at birth. That chart, read against the natal horoscope, governs the twelve months until the next return. The Muntha (the progressed ascendant, advancing one sign per completed year), the Varshesha chosen from the five office bearers by Panchavargiya Bala, the Tajika aspects with their Ithasala and Ishrafa yogas, the Sahams, and the Muddha dasha together give both the character of the year and its timing. This reading is cast for the 29th running year (completed age 28).

Weekly Varshaphal Weeks 1–18

This Varshaphal is computed entirely from the classical Tajika method. The Varsha Pravesha is solved on the ephemeris to the minute - the moment the Sun's sidereal longitude equals its natal value (2026-10-14 04:27 local time, Wednesday) - and the annual chart is cast for that instant at the birth place. Muntha advances one sign per completed year from the natal lagna. Panchavargiya Bala (Griha, Uchcha, Hadda, Drekkana and Navamsha, out of 80) ranks the planets and selects the Varshesha from the five office bearers. Aspects follow Tajika sign-distance drishti within each planet's deepamsha, classified as Ithasala (applying) or Ishrafa (separating). The Muddha dasa compresses the 120-year Vimshottari cycle into this year's true length of 365.26 days, opening with the lord of the annual Moon's nakshatra; monthly and weekly windows are read from whichever Muddha dasa is running, so every level of the report stays consistent with the same chart.
